The viscosity test. E. G. Bayfield	637
Thelar, A. E. Book review. Calculation and interpretation of analyses of variance and covariance by. G. W. Snedecor	347
Trypsin, effect on baking quality of flour. J. W. Read and L. W. Haas	294, 295
Ultra-violet radiant energy, bleaching action of. C. G. Ferrari and A. B. Croze	508
Ultra-violet radiation, use of to destroy mold spores on bread. J. W. Read	80
Use of the glass electrode for direct measurement of H-ion concentration in fermenting doughs. Quick Landis	313
Varietal and regional variations, influencing the	
Carotenoid pigment of wheat. A. G. O. Whiteside, J. Edgar, and C. H. Goulden	615
Diastatic activity of wheat. M. C. Markley and C. H. Bailey	515
Peptizability of wheat flour proteins. C. E. Mangels	164
Viscosity of wheat starches. C. E. Mangels	571
Viscosity, flour-water suspensions	
Correlation with fermentation test for flour quality. E. G. Bayfield	136
Effect of chemical maturing agents on. C. E. Rich	212
Effect of protein and ash on. E. G. Bayfield	132
Factors influencing,	
Ash content of flour. E. G. Bayfield	642
Flour granulation. E. G. Bayfield	638
Hand versus machine mixing of the flour-water suspensions. E. G. Bayfield	640
Protein content of the flour. E. G. Bayfield	643
Temperature. E. G. Bayfield	639
Time of digestion. E. G. Bayfield	639
Possibility of as a substitute for the bromate baking test for measuring flour strength. E. G. Bayfield	139
Study of methods for determining. Walter Reiman	299
Tests with soft wheat flours. E. G. Bayfield	125, 126
Use of in evaluation biscuit and cracker flours. R. M. Bohn	661

	Page
Utility of as a means of determining flour types and grades. Walter Reiman	312
Viscosity, wheat starches, effect of heat on. C. E. Mangels	90, 91, 92
Water absorption (flour), super-centrifuge, method for determining. E. B. Working	567
Water absorption (wheat), comparison of relative rates and amounts with air-dried and extremely dessicated wheat. R. Whymper and A. Bradley	547
Weight per 1000 kernels, correlation with carotene content of wheat. A. G. O. Whiteside, J. Edgar, and C. H. Goulden	615
Wheat,	
Baking tests of flour milled from damaged wheats. C. O. Swanson	190
Carotene content of,	
Correlation with test weight per bushel, 1000 kernel weight and protein content. A. G. O. Whiteside, J. Edgar, and C. H. Goulden	619, 623
Influence of environment on. A. G. O. Whiteside, J. Edgar, and C. H. Goulden	619
Correlation between test weight per bushel of, variety and flour yield. C. E. Mangels	232
Crude protein content of and carotene content, as influenced by environment. A. G. O. Whiteside, J. Edgar, and C. H. Goulden	619, 624
Determination of sprout damage in by use of dipping refractometer. G. Molin	153
Diastatic activity of, effect of,	
Class and regional distribution on. D. A. Coleman, S. R. Snider, and H. B. Dixon	527
Moisture content of, on. C. O. Swanson	187
Effect of,	
Age on the germination of. R. Whymper and A. Bradley ..	349, 546, 625
Desiccation on the longevity of. R. Whymper and A. Bradley ..	354, 355
Heat on after storage for 10 years at low moisture content. R. Whymper and A. Bradley	625
Fat, development of acidity in due to moisture and storage conditions. C. O. Swanson	179
Flour yielding capacity of, effect of,	
Regional variations on. C. E. Mangels	234
Seasonal variations on. C. E. Mangels	571
Variety on. C. E. Mangels	232, 233
Longevity of. R. Whymper and A. Bradley	351
Influence of age and moisture content of, on speed of germination and vitality. R. Whymper and A. Bradley	548
Studies on the vitality of. R. Whymper and A. Bradley	349
Sugar content of, effect of added moisture on. C. O. Swanson	187, 191
Tempering of, effect on diastatic activity of. M. C. Markley and C. H. Bailey	517
Vitality of, relation to moisture content and conditions of storage. R. Whymper and A. Bradley	550
Water absorption of, influence on speed of germination. R. Whymper and A. Bradley	547
Wheat flour malt, effect on baking quality of flour. J. W. Read and L. W. Haas	294
See also W. R. Green	323, 324
Wheat-germ,	
Content of in flour in relation to flour maturation. C. E. Rich	220, 221
Ether extract of, effect on baking quality of middlings flour. C. E. Rich	218, 219
Ether extracted, effect on baking quality of middlings flour. C. E. Rich	218, 219
Influence on middlings flour and improvement in baking quality after treatment with maturing agents. C. E. Rich	215, 216, 217
Wheat-meal-fermentation-time test, value of for determining quality of soft wheats. O. B. Winter and A. G. Gustafson	49
Wheat quality,	
Baking tests. C. O. Swanson	190

	Page
Damage to as determined by, appearance of kernel. C. O. Swanson	175
Decrease in variability of seeds. C. O. Swanson	180
Development of fat acidity. C. O. Swanson	179
Test weight per bushel measurements. C. O. Swanson	184
Wheat starches,	
Phosphorus content of. C. E. Mangels	572
Seasonal influences affecting the properties of. C. E. Mangels	582
Varietal and regional variation in the properties of. C. E. Mangels	575
Varietal variations in. C. E. Mangels	573
Viscosity studies with. C. E. Mangels	573
Wheat storage. Study of conditions favoring damage to quality of during.	
C. O. Swanson	173
Wheat varieties,	
Effect of environment on the diastatic activity of. D. A. Coleman, S. R. Snider, and H. B. Dixon	529
Effect of season, and regional distribution on the properties of. C. E. Mangels	571
Influence of on flour yielding capacity. C. E. Mangels	232
Influence on the magnitude of the viscosity of flour-water-suspensions. E. G. Bayfield	131
Milling and baking tests with soft wheat. E. G. Bayfield	121
Peptization of flour proteins milled from, effect of regional conditions of growth on. C. E. Mangels	164
Quality of as determined by the fermentation time test. O. B. Winter and A. G. Gustafson	50, 51
Relative diastatic activity of. M. C. Markley and C. H. Bailey	522
Whitcomb, W. O. Temperature control in the baking test with revolving shelves in proofing cabinet	403
Whiteside, A. G. O., J. Edgar, and C. H. Goulden. The influence of environment on the carotenoid content of hard red spring wheat	615
Whiteside, A. G. O., W. F. Geddes, and D. S. Binnington. A simple method for the determination of carotene in flour extracts	1
Whiteside, A. G. O., C. H. Goulden, and W. F. Geddes. A study of carotene content and other quality characters in a series of hybrid wheats	557
Whymper, R., and A. Bradley. Studies on the vitality of wheat.	
I. Prolongation of vitality of wheat seeds	349
II. Influence of moisture in wheat seeds upon imbibition and speed of germination	546
III. Vitality, and the action of heat on wheat seeds	625
Wiles, Harold O., and Ross A. Gortner. Physico-chemical studies on proteins.	
VIII. The rotatory dispersion of three gliadin preparations peptized by different solutions	36
Winter, O. B., and A. G. Gustafson. Some experience with the wheat-meal-fermentation-time-test for evaluating soft wheats	49
Working, E. B. The determination of the water absorbing capacity of flour by means of the super-centrifuge	567
Working, E. B., and E. J. Anderson. Quick ash methods	94
Worley, D. F., and C. F. Davis. Correlation between diastatic activity and gassing power in commercial flours	536
Yeast autolysate, effect on baking quality of flour. J. W. Read and L. W. Haas	291, 292
Yeast, effect of excessive amounts in gassing power tests by dough method. R. M. Sandstedt and M. J. Blish	377
Yeast, effect of age on the H-ion concentration of. R. M. Sandstedt and M. J. Blish	378
Yeast maltase, instability of. R. M. Sandstedt and M. J. Blish	375
Yeast stimulant in flour. R. M. Sandstedt and M. J. Blish	379
Yeast variability.	
Control in flour gassing power tests. R. M. Sandstedt and M. J. Blish	368
Comparison of methods of determining. R. M. Sandstedt and M. J. Blish	375
Observations on. R. M. Sandstedt and M. J. Blish	373
Ziegler, Edwin. Book review. <i>Die Getreidespeicher</i> (granaries), by J. K. Hoffmann and K. Mohs	347
